

THIRTEENTH CENSUS OF THE UNITED STATES: 1910

DEPARTMENT OF
COMMERCE AND LABOR

BULLETIN

BUREAU OF THE CENSUS
E. DANA DURAND, DIRECTOR

POPULATION : FLORIDA

COMPOSITION AND CHARACTERISTICS OF THE POPULATION

Prepared under the supervision of WM. C. HUNT, Chief Statistician for Population

The first population bulletin for Florida gave the number of inhabitants by counties and minor civil divisions, the decennial increase and the density of population, and the proportions urban and rural. The present bulletin deals with the composition and characteristics of the population. The two bulletins cover all the principal topics of the population census except occupations and ownership of homes.

Description of the tables.—The greater part of this second bulletin consists of five general tables, which present statistics of color, nativity, parentage, sex, citizenship, illiteracy, school attendance, and dwellings and families, as follows: Table I for the state and counties; Table II for the two cities of more than 25,000 inhabitants; Table III for cities of 10,000 to 25,000; Table IV for places of 2,500 to 10,000; and Table V for wards of Jacksonville, the only city of more than 50,000.

A series of summary tables (numbered 1 to 14) reproduces from the general tables the more important state and city totals, and presents also certain additional data relative to state of birth, age, and marital condition.

On account of the wide differences in characteristics among the different classes of the population, the statistics on each subject are shown according to race, and for the whites according to nativity and parentage. Classification according to nativity and parentage is scarcely necessary for the other races, since nearly all negroes and Indians are native born of native parentage, and nearly all Chinese and Japanese either foreign born or of foreign parentage.

The white population is divided into four groups: (1) Native, native parentage—that is, having both parents born in the United States; (2) native, foreign parentage—having both parents born abroad; (3) native, mixed parentage—having one parent native and the other foreign born; (4) foreign born. As the second and third classes do not differ greatly in characteristics, they are combined in some of the tables; in a few cases all three native white classes are combined.

Since marked differences often exist between urban and rural communities with respect to the composition and characteristics of the population, the two classes are distinguished in connection with several of the subjects. Urban population, as defined by the Bureau of the Census, includes that of all incorporated

places of 2,500 inhabitants or more, the remainder being classified as rural.

The census inquiry as to school attendance was merely as to whether the person enumerated had attended any kind of school at any time between September 1, 1909, and the date of enumeration, April 15, 1910.

The Census Bureau classifies as illiterate any person 10 years of age or over who is unable to write, regardless of ability to read.

Color and nativity (Table 1).—Of the total population of Florida, 443,634, or 58.9 per cent, are whites, and 308,669, or 41 per cent, negroes. The corresponding percentages in 1900 were 56.3 and 43.7, respectively. In 28 of the 47 counties negroes constitute from 25 to 50 per cent of the population, and in 10 the population is more than one-half negro. (See map on a following page.)

Native whites of native parentage constitute almost one-half (49.7 per cent) of the total population of the state and 84.3 per cent of the white population. Native whites of foreign or mixed parentage constitute only 4.8 per cent of the total population, and foreign-born whites 4.5 per cent.

Of the urban population, 37.1 per cent are native whites of native parentage; of the rural, 54.8 per cent. The corresponding proportions for native whites of foreign or mixed parentage are 11.1 and 2.1 per cent, respectively. The percentage of foreign-born whites is 11.2 in the urban population and 1.7 in the rural; the percentage of negroes is 40.4 in the urban and 41.2 in the rural.

Sex (Table 2).—In the total population of the state there are 394,166 males and 358,453 females, or 110 males to 100 females. In 1900 the ratio was 108.7 to 100. Among the whites there are 110.2 males to 100 females; among the negroes, 109.5. For all native whites combined the ratio is 107 to 100, as compared with 157.6 to 100 for the foreign-born whites. In the urban population there are 102.8 males to 100 females, and in the rural, 113.1.

State of birth (Tables 3 and 4).—Of the native population—that is, population born in the United States—65 per cent were born in Florida and 35 per cent outside the state; of the native white population, 35.5 per cent were born outside the state, and of the native negro, 34.3 per cent. Persons born outside the state constitute a much larger proportion of the native population in urban than in rural communities.

POPULATION—FLORIDA.

Foreign nationalities (Table 5).—Of the foreign-born white population of Florida, persons born in Cuba represent 26.3 per cent; Italy, 13.4; Spain, 12.4; England, 8.6; Germany, 7.2; West Indies (except Cuba and Porto Rico), 5.6; Canada, 5; Ireland, 3.2; Turkey, 3.1; Greece, 2.6; Sweden, 2.2; all other countries, 10.5 per cent. Of the total white stock of foreign origin, which includes persons born abroad and also natives having one or both parents born abroad, Cuba contributed 22.5 per cent; Germany, 10.7; Italy, 10.6; England, 10.6; Spain, 7.9; West Indies (except Cuba and Porto Rico), 7; Ireland, 5.3; Canada, 5.1; Scotland, 2.4; Sweden, 2.2 per cent.

Voting and militia ages (Table 6).—The total number of males 21 years of age and over is 214,195, representing 28.5 per cent of the population. Of such males, 58 per cent are whites and 41.9 per cent negroes. Native whites represent 49.9 per cent of the total number and foreign-born whites 8.1 per cent. Of the 17,445 foreign-born white males of voting age, 5,959, or 34.2 per cent, are naturalized. Males of militia age—18 to 44—number 171,688.

Age (Tables 7, 8, and 12).—Of the total population, 12.9 per cent are under 5 years of age, 22.8 per cent from 5 to 14 years, inclusive, 20.5 per cent from 15 to 24, 28.5 per cent from 25 to 44, and 14.9 per cent 45 years of age and over. The foreign-born white population comprises comparatively few children, only 8.9 per cent of this class being under 15 years of age, while nearly three-fourths (72.3 per cent) are 25 years of age and over. The negro population comprises a somewhat smaller proportion of children under 15 than the native white population of native parentage.

The urban population shows a smaller proportion of children than the rural and a larger proportion of persons in the prime of life. Migration to the city explains this at least in part. Of the urban population, 34.3 per cent are from 25 to 44 years of age, inclusive, and of the rural population, 26.2 per cent.

School attendance (Table 9).—The total number of persons of school age—that is, from 6 to 20 years, inclusive—is 243,917, of whom 128,659, or 52.7 per cent, attended school. In addition to these, 2,547 persons under 6 and 2,149 of 21 and over attended school. For boys from 6 to 20 years, inclusive, the percentage attending school was 51.8; for girls, 53.7. For children from 6 to 14 years, inclusive, the percentage attending school was 66. The percentage for children of this age among native whites of foreign or mixed parentage was 76.1; among native whites of native parentage, 72.1; among foreign-born whites, 63.5; and among negroes, 57.1. (See Table I.) In urban communities the percentage of children of that age attending school was 73.3 and in rural 63.6.

Illiteracy (Table 10).—There are 77,816 illiterates in the state, representing 13.8 per cent of the total population 10 years of age and over, as compared with the much higher figure, 21.9 per cent, in 1900. The percentage of illiteracy is 25.5 among negroes, 10.5 among foreign-born whites, and 5 among native

whites. It is 5.2 for native whites of native parentage and 2.2 for native whites of foreign or mixed parentage.

For all classes combined, illiterates are fewer in urban than in rural communities, 8.4 per cent as against 16.2. For native whites the percentage illiterate is 1.1 in urban communities as compared with 6.4 in rural; for negroes the percentages are 15.4 and 30.

For persons from 10 to 20 years of age, inclusive, whose literacy depends largely upon present school facilities and school attendance, the percentage of illiteracy is 9.9. (See Table I.)

Marital condition (Tables 11 and 13).—In the population 15 years of age and over, 36.4 per cent of the males are single and 23.5 per cent of the females. The percentage married is 56.3 for males and 63.8 for females, and the percentage widowed 5.2 and 11.2, respectively. The percentages of those reported as divorced, 0.6 and 0.8, respectively, are believed to be too small, because of the probability that many divorced persons class themselves as single or widowed.

That the percentage single is so much smaller for women than for men is due largely to the fact that women marry younger. Thus 21.5 per cent of the females from 15 to 19 years of age are married, as compared with 1.6 per cent of the males; 64.1 per cent of the females from 20 to 24 years are married, as compared with 29.4 per cent of the males; and among those from 25 to 34 years the percentages are 81.2 and 65.7, respectively. In the next age group, 35 to 44, the difference practically disappears. That there is a larger proportion of widows than of widowers may indicate that men more often remarry than women, but, since husbands are generally older than their wives, the marriage relationship is in fact more often broken by death of the husband than by death of the wife.

For the main elements of the population the percentages of married persons among those 15 years of age and over are as follows: Foreign-born whites, 58.6 for males, 67.9 for females; native whites of native parentage, 57.7 and 64.1, respectively; native whites of foreign or mixed parentage, 48.3 and 56.1, respectively; negroes, 54.9 for males and 63.7 for females.

These percentages by no means indicate the relative tendency of the several classes as regards marriage. To determine that, the comparison should be made by age periods, since the proportion married in any class is determined largely by the proportion who have reached the marrying age. Similarly, the proportion widowed depends largely on the proportion past middle life. The percentage married is slightly higher for males, and decidedly higher for females, in rural than in urban communities.

Dwellings and families.—The total number of dwellings in Florida is 165,818, and the total number of families 171,422, indicating that in very few cases does more than one family occupy a dwelling. (See Table I.) The average number of persons per dwelling is 4.5, and the average number per family, 4.4.

COMPOSITION AND CHARACTERISTICS.
